Subject Index to Volume 7

Acetaminophen: Effects of Ca^{2+} antagonists on hepatic necrosis induced by 453
Acetylcholinesterase: Noncholinergic functions of 1354
Aconitase: Enzyme and iron regulatory factor 1442
Adenosylcobalamin: Source of 5′-deoxyadenosyl radicals in nature 662
S-Adenosylmethionine: Source of 5′-deoxyadenosyl radicals in nature 662
Adenoviral proteins: Interaction with pRB and p53 880
Adenylyl cyclases: Mammalian G_s-stimulated, diversity of 768
Adhesins: And their receptors from human oral bacteria 406
Adhesion: Cell-cell, effect of hyaluronan on 1233
Adhesives: Invertebrate 1115
AIDS: Gene therapy based on diversion of HIV-1 gp160 1070
Albuterol: Effect on edema formation 1394
Alcohols: Effects on acetylcholine receptor function 1460
Allograft arteriosclerosis: Somatostatin analog inhibits myocyte proliferation in 1055
Alzheimer's disease: Potential involvement of glutamate transporters in 1450
Amino acid sequence: Homologies in aminopeptidases 290
Aminoacylation: RNA oligonucleotide, minimalist structures in 282
Aminoacyl-tRNA synthetases
Classes of 79
Minimalist oligonucleotide substrates of 282
Molecular basis for specificity of 72
Recognition of tRNAs by 79
Aminomutases: Lysine and adenosylcobalamin-dependent 662
Aminopeptidases: Structure and function 290
AMPA: Inhibition by enflurane in *Xenopus* oocytes 479
Amyotrophic lateral sclerosis: Potential involvement of glutamate transporters in 1450
Anesthesia: Effects on thermoregulation and heat balance in humans 638
Anesthetics: Local, site at acetylcholine receptor-lipid interface 1460
Angiography: For monitoring atherosclerosis, comparison with ultrasound 1491
Angiosperms: RNA editing in mitochondria and chloroplasts of 64
Antibodies: Interactions with peptide antigens, NMR investigations 1154
Antibody-dependent cellular cytotoxicity: Seasonal variations in regulation by melatonin 1052
Anticodon recognition: In tRNA interactions 79, 87
Antigen mimicry: By immunoglobulin, application of 437
Antigen presenting cells: With genetic defects, role in autoimmune diabetes 1092
Antigen to antibody 383 (50 years ago)
Antioxidants: Free radical scavengers as 1135
Apoptosis
Delayed internucleosomal DNA fragmentation in 470
Nicotine inhibition of 1045
Role of Ca^{2+}-induced DNA fragmentation in 453
Thymocyte, promoted by cyclic AMP and glucocorticoids 580
Aptamers: RNA molecules with new binding functionalities 106
Arachidonic acid: Phospholipase A_2 involved in liberation of 339
Area postrema: Role in maintenance of body fluid homeostasis 678
Arterial wall
Early changes in wall in atherogenesis 1359
Ultrasound visualization of 1491
Aryl acylamidase: Amine-sensitive activity in cholinesterases 1354
Ascorbic acid: Evaluation as free radical scavenger 1135
Asparaginases: Evolutionary relation to mammalian glycosylasparaginases 1247
Aspartylglycosaminuria: Protein chemistry and molecular biology 1247
Astrocytes
Expression of mRNA in experimental autoimmune encephalitis 592
Glycogen synthesis in 1386
In infectious and immune-mediated central nervous system diseases 1226
Astrocytoma cells: Sensitization by serum and by lysophosphatidic acid 1376
Atherogenesis
Lipoprotein catabolism in studied with R-labels 399
Pathobiochemical changes before monocyte migration in 1359
Atherosclerosis: Noninvasive techniques for monitoring 1491
Avian erythroblastosis virus: v-erbA oncogene of 904

***Bacillus subtilis*:** RNase P RNA, gap-scan deletion analysis of 188
Bacteria
Chemoautotrophic in hydrothermal vent environment 558
Diversity in soil sample from subtropical Australian environment 232
Human oral plaque, specific adherence among 406
Ice nucleation by, molecular basis 1338
Bacterial bioluminescence: Organization, regulation, and application of *lux* genes 1016
Basic medical sciences and research 50 years ago 1097 (50 years ago)
Benson-Calvin cycle: Enzyme modulation 622
Bestatin: Aminopeptidase inhibition by 290
Betaine: In cobalamin and folate deficiency 1344
Biochemistry degrees, undergraduate 733
Biodiversity—an international challenge 1107 (Editorial)
Biogenesis: number mysticism in protein thinking 1219
Biomedical research
Decline in funding for 615 (Editorial)
NIH is ithe principal federal agency supporting 1309 (Editorial)
Biomedical science: Is it meeting national needs? 730
Biotechnology core facilities: trends and update 1109
Birth control vaccine: World Health Organisation, efficacy and safety of 1381
B lymphocytes
In vitamin A-deficient rats immunized with tetanus toxoid 1277
Multiple immunoglobulin isotype expression, trans-splicing mechanism 149
Bovine growth hormone: Effects on glucose metabolism in transgenic mice 791
Brain cooling, selective
Evidence against in humans 1148
Evidence for in humans 1143
Brain metabolism, "ferrin", and non-carbohydrate oxidation 601 (50 years ago)
Breast implants: Silicone, human immune response to 1265
Breastovarian syndrome: Hereditary, role of gene mutations in 910
Burkitt lymphoma: Cell lines, p53 protein in 951
Butyrylcholinesterase: Noncholinergic functions of 1354

Ca^{2+} antagonists: Inhibition of DNA fragmentation and toxic cell death 453
Cadherins: And cell-environment interactions in early development 1320
Calcium
Glucocorticoid-induced increases in thymocytes 580
Signals modified by inorganic mercury in PC12 cells 1507
Cancer
Alterations of multiple tumor suppressor genes in 920
c-erbA and retinoic acid receptors in 904
Colorectal 826, 931
Electromagnetic fields used in study of 272
Familial, role of gene mutations in 910
Role of E6-p53 interaction in development of 872
Role of osteopontin in 1475
Role of p53 tumor suppressor gene in 855
Role of *RB1* mutations in 846
Tobacco-related, role of nicotine in 1045
Carboxylase: Vitamin K-dependent 445
Carcinogenesis
Cell cycle control, DNA repair, and initiation of 1188
Choline deficiency and 551
Multistage human 920
Carnitine acyltransferases: Long-chain, regulation of 1039
Carotid rete heat exchanger: In humans 1143, 1148
Catalyst: RNA as 4
CD4: Complexation with HIV gp120 creates novel epitopes 1185
CD45: Role in signal transduction in the immune system 420
Cell adhesion: Reversion and 834
Cell cycle control
Involvement in initiation of carcinogenesis 1188
Role of retinoblastoma gene 841
Cell differentiation
Multi-faceted regulation by the extracellular matrix 737
Role of retinoblastoma gene 841
Cell signaling
Electromagnetic fields used in study of 272
Role of diverse adenylyl cyclases in 768
Via the $\alpha_v\beta_3$ integrin, osteopontin in 1475
Cellular retinoid-binding proteins: Role in retinoid metabolism and activation 317
Central nervous system: Astrocytes in infectious and immune-mediated diseases of 1226
Cerebellum: Noncholinergic effects of acetylcholinesterase in 1354
Chagas' disease: Possible role of *Trypanosoma cruzi trans*-sialidase in 1257
Chaperone: Protein disulfide isomerase as 1515
Chemical nucleases: Use in studying RNA structure and RNA-protein interactions 1367
Chemiluminescence: Nitric oxide assay by 349
Chemoattractant receptors: In activation of neutrophil leukocytes 1004
Chemoautotrophic bacteria: Symbiosis with hydrothermal vent organisms 558
Chemosensitivity: P-Glycoprotein regulation of in early developmental stages 1499

Subject Index to Volume 7

Acetaminophen: Effects of Ca^{2+} antagonists on hepatic necrosis induced by 453
Acetylcholinesterase: Noncholinergic functions of 1354

Role of retinoblastoma gene 841
Cell signaling
Electromagnetic fields used in study of 272
Role of diverse adenylyl cyclases in 768
Via the $\alpha_v\beta_3$ integrin, osteopontin in 1475
Cellular retinoid-binding proteins: Role in retinoid metabolism and activation 317
Central nervous system: Astrocytes in infectious and immune-mediated diseases of 1226
Cerebellum: Noncholinergic effects of acetylcholinesterase in 1354
Chagas' disease: Possible role of *Trypanosoma cruzi trans*-sialidase in 1257
Chaperone: Protein disulfide isomerase as 1515
Chemical nucleases: Use in studying RNA structure and RNA-protein interactions 1367
Chemiluminescence: Nitric oxide assay by 349
Chemoattractant receptors: In activation of neutrophil leukocytes 1004
Chemoautotrophic bacteria: Symbiosis with hydrothermal vent organisms 558
Chemosensitivity: P-Glycoprotein regulation of in early developmental stages 1499

Chemotherapeutic agents: Mitochondrial manganese superoxide dismutase protection of tumor cells against 361
Chemotherapy: Potential use of spermidine/spermine N^1-acetyltransferase in 653
Cheshire cats: Catalytic RNAs viewed as 31
Chloroplasts
Photosynthetic CO_2 assimilation by 622
RNA editing in 64
Chlorpromazine: Effect on acetaminophen-induced hepatic necrosis 453
Cholera toxin peptide: NMR studies of three antibodies against 1154
Cholesterol: Effects on acetylcholine receptor function 1460
Choline phospholipids: Signal transduction and carcinogenesis 551
Cholinesterases: Noncholinergic functions of 1354
Christmas disease: Considerations in genetic correction of 1081
Chromaffin cells: Sigma receptor modulation of nicotinic receptor function in 1171
Chromosome transfer: Tumor suppressor gene studies by 826
Chronic rejection: Somatostatin analog inhibits myocyte proliferation in 1055
Circumventricular organs: Role in maintenance of body fluid homeostasis 678
***Cis*-splicing:** Of pre-mRNA, similarity of *trans*-splicing to 40
Coaggregation: Specific adherence among human oral plaque bacteria 406
Cobalamin: Deficiency, metabolic abnormalities in 1344
Coding systems: Evolution of 282
Collagenases: Invertebrate 1115
Collagen gel sandwich culture: Proline enhancement of hepatocyte function in 586
Collagenous tissue: Role of $\alpha_2\beta_1$ integrin in remodeling and contraction of 1401
Collagens
In hydrothermal vent worm extracellular matrices 558
Invertebrate 1115
Neuronal receptors for extracellular matrix 996
Colon cancer: Familial, role of gene mutations in 910
Colorectal cancer
Direct detection of RB protein in 931
Multiple tumor suppressor gene loci 826
Corticotropin-releasing factor: Antireproductive hormone of the testis 299
Cotinine: Inhibition of apoptosis by 1045
CRBP: *See* Cellular retinoid-binding proteins
Cross-linking: Site-directed, in ribosomal RNA 161
Crystallin: Lens, effects of stepped increases of 464
C-type lectins: Functional role for glycosylation in 1330
Cyclic AMP
Accumulation induced by serum and by lysophosphatidic acid 1376
Opposing roles in vascular control of edema formation 1394
Synergy with glucocorticoids to promote thymocyte apoptosis 580
Cyclic GMP: Intracellular receptor proteins for 328
Cyclic nucleotide phosphodiesterases: Cyclic GMP-dependent 328
Cysteine proteases: Secondary and tertiary structure 783
Cysteine-sulfenic acid: Stabilization and function in enzyme catalysis and gene regulation 1483
Cytochrome *c*: Engineering structure by semisynthesis 505
Cytokines
Astrocyte-derived in experimental autoimmune encephalitis 592
Astroglial, role in limiting spread of pathogens 1226
Regulation of gene expression in response to injury 523

Dehydroepiandrosterone: Is it an antiobesity agent? 414
Delta motif: RNA, structure and catalytic properties 25
Dental amalgam
Mercury release from, evaluation of safety 1432
Recommended strategy for research, education and regulation 1432
Denys-Drash syndrome
Constitutional *WT1* mutations in 886
Deletions of *WT1* and point mutations in 896
Diabetes: Autoimmune, role of defective antigen-presenting cells in 1092
Diabetic retinopathy: Role of $\alpha_2\beta_1$ integrin in 1401
Dianionic trimethoxyphosphorane: Mg^{2+} complex, molecular orbital calculations 137
Diazo-oxonorvaline: Asparagine analog that inhibits glycosylasparaginase 1247
Diazotization: Nitric oxide assay by 349
Differential display: Identification of $\alpha 6$ integrin as candidate tumor suppressor gene 964
Differentiation: Role of *RB1* in 846
Dimerization: In vitro of HIV-2 leader RNA 181
Diplomonadida: Unique phylogenetic position 223
"Discontinuous group II" *trans*-splicing 40
Divalent cations
Role in RNA catalytic mechanism 25
Vital for catalysis in ribozymes 31
DNA
Damage, involvement in initiation of carcinogenesis 1188
Fragmentation induced by Ca^{2+} in cell necrosis 453
Fragmentation in thymocytes potentiated by cyclic AMP 580
Internucleosomal, delayed fragmentation in apoptosis 470
Domain assembly: Of the *E. coli* 30S ribosome 177
Doxorubicin resistance: Modulation in multidrug-resistant cells by liposomes 572
***Drosophila*:** Novel laminin A chain 375
Drug discovery: In vitro selection and evolution of RNA in 106
Drug distribution: Potential use of residualizing labels for study of 399
Drug resistance: Modulation by liposome-encapsulated doxorubicin 572

E6 and E7 viral oncoproteins: Interactions with products of tumor suppressor genes 872
Edema: Opposing roles of cyclic AMP in vascular control of 1394
Editosome: Complex involved in mRNA editing 54
Effectors: G-protein, potential targets for tissue-specific drugs 768
Elastin: Elastic properties of the extracellular matrix due to 1208
Elastin gene: Characterization and regulation 1208
Electric fields: Induced, not involved in neurite outgrowth 801
Electromagnetic field: Interactions with biological systems 272
Electron paramagnetic resonance
Characterization of molecular targets for NO 1124
Nitric oxide assay by 349
Embryogenesis: Early mammalian, adhesive interactions in 1320
Emeritus professors can, assistant professors mustn't 255 (Editorial)
Endonuclease
Activation in thymocytes induced by glucocorticoid 580
Activation unnecessary in programmed cell death 470
β-Endorphin: Stimulation of secretion by Leydig cells 299
Endothelial cells
Gene expression in response to injury 523
Interactions with pericytes 1031
Protective mechanisms for limiting size of hemostatic plug 516
Endothelium-dependent relaxing factor/nitric oxide (EDRF/NO): Protective mechanism for limiting size of hemostatic plug 516
Endothelium-derived relaxing factor: Nitric oxide as 349
Energy balance: Promotion of positive by dehydroepiandrosterone 414
Energy cost: Of proofreading in vivo 168
Energy-dependent transphosphorylation over 50 years 711 (50 years ago)
Enflurane: Inhibition of NMDA, AMPA, and kainate-induced currents 479
Enhanced growth variants: Initiated cells involved in initiation of carcinogenesis 1188
Enolase: Increased concentration in transgenic lens 464
Enzyme catalysis: Protein-sulfenic acid stabilization and function in 1483
Enzyme inhibition: Studies on 486 (50 years ago)
Enzyme modulation: Of the reductive pentose phosphate cycle 622
Enzyme nomenclature: A personal retrospective 1192 (50 years ago)
Epstein-Barr virus EBNA-5 protein: Complex with retinoblastoma proteins 841
ErbA: Tumor suppressor turned oncogene? 904
Erythrocytes: Enhancement of platelet reactivity 516
Escherichia coli
Energy cost of proofreading in 168
Evidence for domain assembly of 30S ribosome 177
Rho factor, enrichment of RNA species for tight binding to 201
Transfer RNA precursors, 3′ processing of 143
Etretinate: Effect on plasma retinol concentration 1179
***ets*-1 transcripts:** Structure corresponds to circular RNA molecules 155
Eukaryotic cells: Signal transduction and antibacterial activity in 1011
Evolution
Extracellular matrix 1115
Laminin chains 375
Mammalian and bacterial/plant asparaginases 1247
Pre-mRNA *trans*-splicing in 40
Primordial catalytic RNAs in 15
Prokaryotic and eukaryotic glutamate transporters 1450
RNA 4
RNA editing 54, 64
RNA in vitro 106
Excitatory postsynaptic currents: Glutamate transport contribution to 1450
Exoribonucleases: Required for 3′ processing of *E. coli* tRNA precursors 143
Experimental autoimmune encephalitis: Astrocyte expression of cytokine mRNA in 592
Extended life span variants: Initiated cells involved in initiation of carcinogenesis 1188
Extracellular matrix 735
Adhesive interactions in early mammalian development 1320
Evolution in invertebrates 1115
Hyaladherin regulation of hyaluronan function in 1233
Hydrothermal vent worms 558
Its receptors and functions in the nervous system 996
Multi-faceted regulation of cell differentiation by 737
Role of metalloproteinases in tumor invasion and metastasis 1434
The elastic fiber 1208
Eye diseases: Human, potential role for $\alpha_2\beta_1$ integrin in 1401

Factor IX: Human, produced in transfected cell lines 1081
Fenretinide: Effect on plasma retinol concentration 1179

SUBJECT INDEX

Gliomas: Human, gene and chromosomal alterations in 926
Glucocorticoids
Lytic response related to quantity of membrane receptors 1283
Synergy with cyclic AMP to promote thymocyte apoptosis 580
Gluconeogenesis: Relationship to hepatic glutaminase expression 1468
Glucose
Metabolism in transgenic mice containing PEPCK/bGH gene 791
Utilization, effects of dehydroepiandrosterone on 414
Glutamate transporters: High-affinity, a new family of neurotransmitter transporters 1450
Glutaminases: Hepatic and kidney-type 1468
Glutamine: Enzymes of metabolism of 1468
Glycobiology: Concepts and principles of 1330
Glycogen: Synthesis in the astrocyte 1386
Glycogenin: Synthesis in glucose-fed astrocytes 1386
P-Glycoprotein: Regulates chemosensitivity in early developmental stages 1499
Glycoproteins
Biosynthesis in yeast 540
Degradation disorder 1247
Glycosylasparaginases: Protein chemistry and molecular biology 1247
Glycosylation: Studies in yeast 540
Glypican-related integral membrane proteoglycans (GRIPs): Structure, function, and expression of 1023
Group I and group II introns 15
Group I intron: Cations vital for catalysis in 31
Group II intron: Discontinuous form of *trans*-splicing in 40
Growth hormone-releasing hormone: Sleep promotion by 645
Growth suppressor proteins: Interactions with SV40 T-antigen 866
G_s proteins: Stimulation of mammalian adenylyl cyclases 768
GTP-binding proteins: Low molecular weight, action and regulation of 750
Guide RNAs (gRNAs): In kinetoplastid RNA editing 54

Hairpin motif: RNA, structure and catalytic properties 25
Halothane: Effects on thermoregulation and heat balance in humans 638
Hammerhead motif
Cations vital for catalysis in 31
RNA, structure and catalytic properties 25
Hammerhead ribozymes: In studies of chemically modified RNA 90
Heat balance: Human, effects of anesthesia on 638
Heat loss: From the head in humans 1143, 1148
Hemostasis: Multicellular modulation of platelet reactivity in 516
Heparan sulfate proteoglycans: Of cell surface-associated heparan sulfate 1023
Hepatic glutaminase: Relationship to kidney-type glutaminase and the urea cycle 1468
Hepatitis delta virus
Ribozyme, stem structures of genomic 124
Self-cleaving RNA from 130
Hepatocytes
Maintenance of function in sandwich gel configuration 586
Regulation of differentiation by the extracellular matrix 737
Hepatoma cell lines: Human, retinoblastoma and p53 genes in 1407
Heterozygosity
And accumulation of p53 mutant proteins 951
Loss of in human gliomas 926
***Hexamita* sp.:** Phylogenetic relationship based on small subunit rRNA 223
Histone pre-mRNAs: 3′ processing of 47
HIV gp120: Complexation with CD4 creates novel epitopes 1185

Transcription: Regulation by WT1 896
Transcription factors
Cysteine-sulfenic acid derivatives in redox regulation of 1483
v-erbA and c-erbA act as 904
Transfer RNA
Binding to bacterial ribosomes 161
Biosynthesis, ribonuclease P and 7
Identity and recognition of 72
Interactions with rRNA 87
Recognition by aminoacyl-tRNA synthetases 79
Transfer RNA precursors: *E. coli,* exoribonucleases requires for 3′ processing of 143
Transformation: Mutant p53 and 855
Transformed cells: Mechanisms of reversion of 834
Transgenic mice
Effects of bGH on glucose metabolism in 791
Expression of duck α-enolase/τ-crystallin gene in 464
***Trans*-mRNA:** Encoding immunoglobulin ε heavy chain 149
Transpositional recombination: Models and mechanisms for 760
***Trans*-splicing**
Mechanism in *trans*-mRNA synthesis 149
Of pre-mRNA in plants, animals, and protists 40
Triage: In peer review, statistical model validating 1312
Trophoblasts: Roles of integrins in differentiation and invasion of 1320
Tropoelastin: Elastin precursor in the extracellular space 1208
***Trypanosoma cruzi*: *Trans*-sialidase enzyme activity of** 1257
Tumor cells: Metastatic potential related to hyaluronan receptor expression 1233
Tumorigenesis: Cholinesterases in 1354
Tumor initiation and progression: Role of *RB1* in 846
Tumor necrosis factor: Mitochondrial manganese superoxide dismutase induction by 361
Tumor progression
Accumulation of somatic mutations in 920
Gene amplifications associated with 926
Tumor suppressor genes
Cell hybridization and chromosome transfer studies of 826
Differential display in screening for 964
Genetic alterations and initiation of malignancies 886
How they were discovered 978 (24 years ago)
In human hepatoma cell lines 1407
Multistep alterations in carcinogenesis 920
Overview of 821
The hope 819 (Editorial)
Tumor suppressor proteins: Interactions with human papillomavirus transforming proteins 872
Tumors
Invasion and metastasis, matrix metalloproteinases in 1434
Three-step model of invasion by 1434
Twenty-five years ago: Anticipating an RNA world 238
Tympanic temperature: And selective brain cooling 1143, 1148
Tyrosine kinases
Modulation in human neutrophils by phorbol esters 687
Signaling mechanism in IL-β induction of nitric oxide formation 369
Tyrosine phosphatase: CD45, role in signal transduction in the immune system 420

Ultrasonography: For monitoring atherosclerosis, comparison with angiography 1491
Urea cycle: Relationship to hepatic glutaminase expression 1468
Vaccines
Against HIV, potential use of epitopes in 1185
Birth control, World Health Organisation 1381
***Vairimorpha necatrix*:** Phylogenetic relationship based on small subunit rRNA 223
Vascular smooth muscle relaxation: Cyclic GMP regulation of 328
Vasoactive intestinal polypeptide: Effect on edema formation 1394
Vectors: Synthetic retrotransposon for gene therapy 971
Verapamil: Effect on acetaminophen-induced hepatic necrosis 453
***Vibrio fischeri*: *Lux* autoinducers and regulatory proteins of** 1016
***Vibrio harveyi*: *Lux* autoinducers and regulatory proteins of** 1016
Vitamin A: Status of tetanus toxoid-immunized rats 1277
Vitamin B_{12}: Deficiency, metabolic abnormalities in 1344
Vitamin K-dependent proteins: Synthesis of 445
Vitreoretinopathy: Role of $\alpha_2\beta_1$ integrin in 1401
Vitreous: Integrin-mediated contraction in retinal detachment 1401
Von Hippel-Lindau syndrome: Hereditary, role of gene mutations in 910
von Willebrand factor: Structure, synthesis, and function 308

Wilms tumor
Deletions of *WT1* and point mutations in 896
Evidence for heterogeneity 826
Role of *WT1* and alternative loci in 886
Women: Increasing opportunities for 393 (Editorial)
World Health Organisation: Birth control vaccine, efficacy and safety of 1381
WT1 gene product: Role in normal kidney development 896
***WT1*, Wilms tumor suppressor gene 1:** Role in Wilms tumorigenesis 886

***Xenopus* oocytes**
Enflurane inhibition of NMDA, AMPA, and kainate-induced currents in 479
TAT activation of translation in 214

Yeast: Glycoprotein biosynthesis in 540
Yeast two-hybrid assay: p53-T antigen interaction reconstructed in 957

Zinc: Role in aminopeptidase substrate liganding 290
